To-momow the Union people of the country are called upon to hold their primary or township meetings, to select delegates to the convention at the Country House next Tuesday. The country townships will hold their meetings in the day time, and the city in the overlaing. We would urge upon our friends the importance of a full attendance at the primary meetings, in order to send townships will hold their meetings in the day time, and the city in the evening. We would arge upon our friends the importance of a full attendance at the primary meetings, in order to send good and full delegations to the general convention. There are no new lights as to probable nominees, but the general opinion is that Mr. Lamb will be sone of those from the city, and Col. convention. Here are consistences, but the general opinion is that Mr. Lamb will be sone of those from the city, and Col. Cartis the one from the country. Opinions are much divided as to who the other should be.

Jacon Honningon, Esq., returned a day or two since from Richmond, whither he had been on one of his usual missions. He gives us a very encouraging sount of the "situation" there at this country in the rebel Congress. Peirpoint is exceedingly hopeful of the progress that is being be glad to know it, for as yet they are made, and thinks it genuine. The Governor himself is quite popular with the Richmond people, and has as much of confidence and good will as is usual Governors. One of the best things we hear is that the people generally are at work, exerting themselves in the sweat of their brows to earn a livelihood. The hands of the male population are not near so soft as they used to be, and the females are much modified as regards their ideas of domestic economy. Land is very cheap around Richmond, but the wave of immigration is rolling in.

Ir would seem both by what Mr. II. tells us, as well as by an article in the Richmond Republic, that serious apprebensions are felt for the coming winter in regard to those of limited means. The Republic speaks thus on the sub-

The poverty and sufferings of the people in Virginia, great enough already to melt the sternest nature, bid fair to assume proportions of horror in the approaching winter which it endles the blood to contemplate. We speak from personal knowledge when we state that families once in affluence, and which bear the names of some of the best and wiseat men of former days, have been dependent for surport since the sest and wiscat men of normer any, have been dependent for support since the evacuation of Richmond on rations issued by the United States Govern-ment. But for the liberality of that Government, starvation—literal star-vation—would have swept multitudes of our people from the face of the earth.

ness with which the New York World and all its echoes have silenced the clamor which they begun a little while ago against the exemption of national securities from State taxation. They were just fairly launched upon a high tide of objugatory declarations relative to "bondoeracies," State rights, &c., when a cruel thunderbolt, bearing the form of a legal opinion, from the pen of that eminently "conservative" jurist, George F. Curtis, struck them instantly dumb. To dispute an authority which for the last four years they have been those with whom she was on terms of puffing with all the might of their political believe machinery, as the au-thority of authorities, above any appeal in questions of constitutional law, was they could venture to undertake. So meekly subsided at once, and hastily dropped the new epithet of "Bondocracy" which they had invented, with a secret malediction upon the fate which thus cruelly destroyed so

Happily, Mr. Curtis was called upon to consider the question of the exception of national bonds from State taxation as a lawyer, and not us a politician, and it was in his professional capacity, as legal counsellor to the Metric of the material of the professional capacity, as legal counsellor to the Metric of the material of the ma capacity, as legal counsellor to the Metropolitan Bank of New York, that he gave the opinion which so effectually poisoner, Mrs. Grinder, in Phisburg, uelched a noisy section of the State Rights Repudiationists. Reviewing Marston, make a fearful chapter of Rights Repudiationists. Reviewing the Supreme Court decisions which hear upon the point in question, he concluded unhestatingly that the bonds of the national government cannot be taxed by the States, and that the xational lanking Associations whose currency is issued upon those securities cannot, on that necount, be taxed as corporations, but that their shares of capital stock may be taxed, on the technical ground that such taxation is not a tax upon government bonds.

Official Recommendation.

Department of State, Washington, Sept. 1, 1865.

To His Excellency, the Governor of the State of West Virginia, Wheeling: Sin: Your Excellency's serious atthe Army, to whom the dispatch from the Army, to whom the dispatch from the United States Minister at Constan the United States Minister at Constant thoppe, which it mentions, was referred. The expediency of adopting sanitary measures for the purpose of preventing the introduction of Asiatic cholera into this country seems well worthy of consideration.

I have the honor to be Your Excellency's ob't serv't WILLIAM II, SEWARD.

LEGATION OF U. S. OF AMERICA, CONSTANTINOPLE. Hon. William H. Seward, Secretary 10

WE fear that Gov. Sharkey, of Missouri, is hardly justifying his reputation by wisdom. We supposed him to be the ablest of Provisional Governors. But he is making graver mistakes than any of the others, if the accounts we receive are true. He is proceeding as if civil law and the authority of State locality where the first deaths from an Egyptian man-of-war took place, and has thence gradually extended itsel over the Christian quarter of Pera, and through Stamboul, (Constantinople proper.) In the most intested region Cassin Pacha, where it originally broke out—a quarter inhabited chiefly by workmen connected with the navy yard and situated in a low valley, encompassed by high hills, with imperfed draining—in has been very fath, having attacked almost the entire population. Such have been its ravages there that the Government has ordered all the large khans and buildings occupied by many persons together, to be varieties. civil law and the authority of State government were fully restored, and be were the actual Governor. He has ap-pointed courts and sheriffs, and has complained that the military authorities do not honor the writ of habsas corpus, issued by those courts. He has endeavored to set on foot a military force. He has ordered each county to raise and arm two companies of soldiers. We are at a loss to understand how he could have committed such errors. Mr. Seward and Mr. Stanton, it is said, have promptly reminded him that martial law is still in force in the

the large khans and buildings, occupied by many persons together, to be yaeated, and has provided tents for them
on the heights surrounding the city.

Had proper quarantine measures
been taken at first, the introduction of
the Cholera from Egypt might hav
been prevented. It seems to me, from
our experience here, that it will be advisable in the United States to guard
against it by the most rigid quarantine
regulations. Otherwise, if it once can
ters the country, it will be very fainl,
in consequence of the great destitution
prevailing in Virginia and other of the
Southern States, and of the diseases
which always follow in the train of
war. State, and Gen. Slocum has forbidden the organization of the companies ordered by Gov. Sharkey, and has order ed all citizens holding arms to give them up to the United States officers, If Gov. Sharkey is not disposed to conform to the ideas of the General Government, of course he must resign. Bu we cannot understand how he can fail Provisional Government, sustained by

which always follow in the train of war.

The published number of deaths per day now is about one hundred and sixty, but they are known to largely exceed that number. The whole number of deaths from the origin of the disease to the present time is about two thousand.

A great panie prevails among the population, particularly the Christian portion of it, and people are fleeing by thousands in every direction from the city. It is hoped, however, that the satisfry measures adopted by the Government, and pursued with great energy, will have the effect sooner or later to arrest the épidemie.

With great respect, your ob'dt serv' E. Joy Mouris,

At a considerable expenditure of time and any amount of inquiry of those who are engaged in developing, operating or boring for oil in the section composed of Wood, Wirt and Ritchie counties of this State, as well as from those who are actually engaged in pumping or producing, relying only upon statements from persons of veracity, and not from information derived from "a reliable gentleman," we are enabled to lay before our readers, for the benefit of the curious, the doubting, and more has confessed to an equal degree of guilt. The correspondent of the Chlcago Republican writes from St. Louis: cago Republican writes from St. Louis;
Daniel Andreas, late postmaster at

several horrid deeds. He confesses
that he murdered a returned Californian, some eight or ten years ago, and
robbed the body of about \$10,000, and lay before our readers, for the benefit of the curious, the doubting, and more particularly those who are interested in oils and oil lands the following information. The Burning Spring Regions, being at the present time the most important point, for the reason more oil is now being produced on the fluo bearing that name and its tributaries than any other in West Virginia.
